SUMMARY

AWS Solution Architect with 11 years of experience in cloud operations and DevOps. Expertise in designing secure, scalable cloud architectures and driving GitOps-based automation using GitLab CI/CD. Highly skilled in Terraform and AWS CloudFormation, with a focus on reliability and operational excellence. Proven leader in mentoring teams and managing end-to-end delivery across enterprise cloud platforms.

SKILLS

- **Cloud Platforms:** Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP)
- **Amazon Web Services (AWS):** EC2, S3, EBS, ELB/ALB, Auto Scaling, RDS, IAM, VPC, CloudWatch, CloudTrail, Control Tower, Landing Zone, Guardrails, KMS, SNS
- **Infrastructure as Code & Configuration Management:** Terraform, AWS CloudFormation, Ansible
- **DevOps & Containerization:** Docker, Kubernetes, Jenkins, GitLab, CI/CD Pipeline Automation
- **Scripting & Programming:** Python, Bash/Shell, YAML, JSON
- **Networking & Security:** Amazon VPC, VPN, Direct Connect, AWS Shield, IAM, network segmentation and access control
- **End-to-End Delivery Ownership:** Planning, estimation, execution, deployment, and release management
- **Agile & Lean Delivery:** Sprint planning, backlog grooming, iterative and incremental delivery models
- **Risk & Dependency Management:** Proactive risk identification, mitigation strategies, stakeholder escalation
- **Technical Documentation & Design:** Business requirement analysis, architecture/design documents, operational runbook

CERTIFICATIONS

- TERRAFORM ASSOCIATE - HashiCorp
- GOOGLE ASSOCIATE CLOUD ENGINEER - Google Cloud
- AZURE ADMINISTRATOR - Azure Cloud
- AWS CERTIFIED SOLUTIONS ARCHITECT – ASSOCIATE - AWS Cloud
- AWS Certified SysOps Administrator - AWS Cloud
- RED HAT CERTIFIED ENGINEER (RHCE) - Red Hat

EXPERIENCE

ACCENTURE INDIA PRIVATE LIMITED

Pune, Maharashtra

Infra Transformation Associate Manager

11/2023 to Current

- Led technical direction for AWS cloud-native and Python solutions, driving solution design, delivery estimation, Agile planning, team execution, and secure production deployments.
- Implemented Terraform and AWS SSM for automated provisioning, enhancing system efficiency.
- Designed and implemented cost-optimized, scalable architectures for enterprise applications.
- Delivered multiple cloud and data integration programs on schedule by proactively managing risks, tracking milestones, enforcing review gates, and maintaining high quality and security standards.
- Implemented IAM role-based access and security policies, reducing unauthorized access risks by 40%.
- Managed day-to-day technology operations, ensuring service excellence through effective Incident, Problem, and Change Management, including ownership of SEV-1/SEV-2 incidents, with strict SLA compliance.
- Guided a team of engineers in AWS architecture, enhancing their skills in Python development and DevOps practices.
- Provided technical and people leadership to a 12-member engineering team, ensuring high-quality delivery, SLA adherence, operational stability, and continuous capability enhancement across AWS Cloud.
- Analyzed operational and delivery metrics to identify trends, performed root cause analysis (RCA), and implemented engineering-led corrective actions to improve application reliability and Technical Application Scores.

COGNIZANT TECHNOLOGY SOLUTIONS

Pune, Maharashtra

Sr. Associate

11/2021 to 11/2023

- Established and continuously improved delivery governance frameworks, including risk management, defect prevention, communication plans, and release controls.
- Implemented status reporting, delivery dashboards, and KPI tracking to provide real-time visibility into project health, operational metrics, and team performance.
- Designed and deployed secure, HIPAA-compliant AWS architectures supporting healthcare workloads using services like VPC, EC2, RDS, S3 (with encryption), and KMS.
- Integrated real-time monitoring and security controls with CloudWatch, AWS Config, and GuardDuty, resulting in 30% faster incident detection, and improved audit readiness for HIPAA compliance.

L&T TECHNOLOGY SERVICES

Mysuru, Karnataka

Sr. Engineer

10/2019 to 11/2021

- Designed and implemented highly available and scalable cloud infrastructure on AWS using services like EC2, S3, VPC, and RDS, supporting critical client-facing applications with 99.99% uptime.
- Developed CI/CD pipelines using Jenkins and Bitbucket, enabling automated build, test, and deployment processes to improve delivery speed and code quality.
- Containerize microservices and applications by building and maintaining optimized Dockerfiles and Docker images, ensuring lightweight, portable, and consistent deployments.
- Deploy and manage Kubernetes clusters to orchestrate containerized workloads, ensuring high availability, scalability, and resource efficiency across development and production environments.
- Monitor infrastructure and application performance using Prometheus and Grafana, setting up custom dashboards and alerts to proactively identify and resolve system anomalies.
- Troubleshoot and resolve issues across the CI/CD pipeline, containers, and orchestration layers, driving root cause analysis and continuous improvements to DevOps workflows.

FINLOGIC TECHNOLOGIES INDIA

Surat, Gujarat

Assistant Manager

03/2018 to 01/2019

- Performed OS upgrades and patch management for Red Hat Enterprise Linux (RHEL) and SUSE Linux servers, ensuring system stability, compliance, and minimal downtime.
- Administered and optimized NGINX web servers for load balancing, reverse proxy, and secure content delivery across staging and production environments.
- Implemented and maintained Zabbix and Nagios monitoring solutions for proactive infrastructure health checks, alerting, and performance tuning.
- Automated routine operational tasks and deployments using Rundeck, improving efficiency and reducing manual intervention.

GNFC LTD

Ahmedabad, Gujarat

Network & System Engineer (N)Code Solution

01/2016 to 01/2018

- Design, implement, and manage network infrastructure including LAN/WAN, firewalls, routers, switches, and VPNs to ensure optimal performance and security.
- Monitor and maintain system servers (Windows/Linux) and enterprise applications, ensuring 24/7 availability and reducing unplanned downtime.
- Troubleshoot and resolve network and system issues promptly, providing root cause analysis and implementing preventive measures.

PROJECT

Air Liquide (chemical industry) - Accenture India Private Limited - August 2025 – present

- Designed and implemented GitOps-driven infrastructure automation using GitLab CI/CD, enabling version-controlled deployments across multiple AWS accounts
- Developed Infrastructure-as-Code (IaC) workflows in Terraform, integrated with GitLab pipelines, ensuring consistent, automated provisioning of AWS resources
- Integrated ServiceNow (SNOW) with automation workflows to enable self-service AWS provisioning, such as automated creation of AWS accounts, VPCs, and network components based on approved service requests
- Built and maintained custom ServiceNow API integrations with AWS Lambda and AWS Organizations to

automatically create, configure, and tag new AWS accounts per business unit and cost center

- Automated VPC peering request fulfillment through ServiceNow workflows linked to GitLab pipelines, reducing manual interventions and provisioning time by 70%
- Reduced provisioning errors by over 80% by automating ServiceNow-to-GitLab-to-AWS deployment workflows

Molson Coors (Beverage) - Accenture India Private Limited - November 2023 – July 2025

- Configured AWS IAM roles and policies, enhancing access control, and reducing security risks
- Implemented AWS Elastic Load Balancing, improving application availability and user experience
- Documented common issues and solutions, creating a knowledge base that improved team response times
- Architected a multi-region disaster recovery solution using AWS S3 cross-region replication, ensuring 99.99% data durability, and reducing recovery time objective (RTO) by 40%
- Developed a cost-effective storage solution using Amazon EFS and lifecycle policies that reduced storage expenses

Medtronic (Life Sciences) - Cognizant Technology Solutions - November 2021 – November 2023

- Provided technical support and optimization for life sciences workloads on AWS, leveraging services like AWS Lambda to automate data processing pipelines and reduce manual intervention
- Designed, reviewed, and deployed infrastructure-as-code solutions using AWS CloudFormation, enabling consistent environment replication and reducing configuration errors
- Developed and maintained documentation and runbooks for AWS-based deployments and incident response, ensuring 100% knowledge transfer readiness and faster onboarding for new team members

PCCW (Telecommunication) - L&T Technology Services - November 2020 – April 2021

- Designed and implemented CI/CD pipelines using Jenkins and Bitbucket, enabling automated build, test, and deployment processes to improve delivery speed and code quality
- Containerized microservices and applications by building and maintaining optimized Dockerfiles and Docker images, ensuring lightweight, portable, and consistent deployments
- Deployed and managed Kubernetes clusters to orchestrate containerized workloads, ensuring high availability, scalability, and resource efficiency across development and production environments
- Monitored infrastructure and application performance using Prometheus and Grafana, setting up custom dashboards and alerts to proactively identify and resolve system anomalies
- Troubleshoot and resolved issues across the CI/CD pipeline, containers, and orchestration layers, driving root cause analysis and continuous improvements to DevOps workflows

Continental AG (Transport) - L&T Technology Services - October 2019 – October 2020

- Analyzed cloud resource usage and provided cost optimization strategies, using AWS Cost Explorer and Trusted Advisor to cut unnecessary spending by up to 20–30%
- Configured and managed VPCs, subnets, and security groups, ensuring secure and isolated network environments across multi-account AWS organizations
- Conducted performance tuning on Linux systems and AWS services (e.g., RDS, ECS), identifying bottlenecks, and applying kernel-level or resource-level optimizations
- Maintained configuration management using tools like Ansible or AWS Systems Manager to enforce consistency and compliance across all Linux environments

EDUCATION

MASTER OF COMPUTER APPLICATIONS

01/2014

S. K. Patel Institute of Computer Studies, Gandhinagar, Gujarat

BACHELOR OF COMPUTER APPLICATIONS

01/2010

Bhola Bhai Patel College of Computer Studies, Gandhinagar, Gujarat
